

# 密存键盘 / SafeClip 隐私协议

---

更新日期 / Last updated: 2026-05-26

本隐私协议适用于密存键盘 / SafeClip。

This Privacy Policy applies to SafeClip.

开发者 / Developer: 缪海露

联系邮箱 / Contact Email: miaohl@aliyun.com

## 1. 我们收集的信息 / Information We Collect

密存键盘 / SafeClip 不要求注册账号，也不会主动收集你的姓名、手机号、地址、银行卡号、身份证号或其他个人信息。

SafeClip does not require account registration and does not actively collect your name, phone number, address, bank card number, ID number, or other personal information.

你在 App 中保存的内容由你主动输入或粘贴，可能包括地址、发票信息、银行卡信息、身份证信息、常用短语等。

The content saved in the app is entered or pasted by you, and may include addresses, invoice details, bank card information, ID information, common phrases, and similar content.

## 2. 信息如何保存 / How Information Is Stored

你保存的信息会存储在设备本地。为了支持换设备后继续使用，App 支持通过 Apple iCloud 在你的个人 iCloud 账户内同步数据。

Your saved information is stored locally on your device. To support use on a new device, the app can sync data through Apple iCloud within your personal iCloud account.

银行卡号和身份证号会默认隐藏并加密保存。加密使用系统提供的安全能力，密钥保存在 Apple Keychain 中。

Bank card and ID numbers are hidden and encrypted by default. Encryption uses system security capabilities, and the key is stored in Apple Keychain.

## 3. iCloud 同步 / iCloud Sync

密存键盘 / SafeClip 使用 Apple CloudKit / iCloud 私有数据库进行同步。同步数据保存在你的 iCloud 账户中，开发者不会拥有或运营独立服务器来保存你的数据。

SafeClip uses Apple CloudKit / iCloud private database for sync. Synced data is stored in your iCloud account. The developer does not own or operate a separate server to store your data.

iCloud 同步受 Apple iCloud 服务条款和隐私政策约束。

iCloud sync is subject to Apple's iCloud terms and privacy policy.

如果你不希望使用 iCloud 同步，可以在系统设置中关闭 iCloud Drive 或关闭本 App 的 iCloud 权限。关闭后，跨设备同步可能不可用。

If you do not want to use iCloud sync, you can turn off iCloud Drive or disable iCloud access for this app in system settings. Cross-device sync may become unavailable after doing so.

## 4. 自定义键盘 / Custom Keyboard

密存键盘 / SafeClip 提供 iOS 自定义键盘，用于快速输入你在 App 中保存的内容。

SafeClip provides an iOS custom keyboard for quickly inserting content saved in the app.

当前键盘扩展不请求“完全访问”。键盘不会收集、上传或分析你的键盘输入内容。

The keyboard extension does not request "Full Access". The keyboard does not collect, upload, or analyze what you type.

当你在键盘中点击某条已保存内容时，键盘会把该内容插入当前输入位置。若你开启了“复制私密信息时验证”，已隐藏的银行卡号、身份证号等内容不会出现在键盘里。

When you tap a saved item in the keyboard, the keyboard inserts that content into the current text field. If "verify when copying private info" is enabled, hidden bank card or ID numbers will not appear in the keyboard.

## 5. 剪贴板 / Clipboard

当你点击复制或从剪贴板粘贴时，App 会根据你的操作访问系统剪贴板。App 不会在你未操作的情况下后台读取剪贴板。

When you tap copy or paste from the clipboard, the app accesses the system clipboard according to your action. The app does not read the clipboard in the background without your action.

## 6. Face ID / Touch ID / 系统验证

你可以选择开启“打开 App 时先验证”或“复制私密信息时验证”。验证由 iOS 系统完成。

You may choose to enable verification when opening the app or copying private information. Verification is handled by iOS.

密存键盘 / SafeClip 不会读取、保存或上传你的 Face ID / Touch ID 生物识别数据。

SafeClip does not read, store, or upload your Face ID / Touch ID biometric data.

## 7. 第三方服务 / Third-Party Services

密存键盘 / SafeClip 不集成广告 SDK，不进行第三方广告追踪，也不主动向第三方分析服务发送你的使用数据。

SafeClip does not integrate advertising SDKs, does not perform third-party ad tracking, and does not actively send your usage data to third-party analytics services.

App 使用 Apple 提供的系统能力，包括 iCloud、CloudKit、Keychain、Face ID / Touch ID 和自定义键盘扩展。

The app uses system capabilities provided by Apple, including iCloud, CloudKit, Keychain, Face ID / Touch ID, and custom keyboard extensions.

## 8. 数据删除 / Data Deletion

你可以在 App 内删除已保存的信息。删除后，该内容不会继续在 App 首页或键盘里显示。

You can delete saved information in the app. After deletion, the content will no longer appear on the home screen or in the keyboard.

如果数据已同步到 iCloud，删除操作也会通过 iCloud 同步到使用同一 Apple ID 的设备。同步完成时间取决于系统和网络状态。

If the data has synced to iCloud, deletion will also sync to devices using the same Apple ID. Completion time depends on the system and network status.

## 9. 儿童隐私 / Children's Privacy

密存键盘 / SafeClip 面向一般用户，不专门面向儿童，也不会主动收集儿童个人信息。

SafeClip is intended for general users and is not specifically directed to children. It does not actively collect children's personal information.

## 10. 隐私协议更新 / Changes to This Policy

我们可能会根据功能变化或合规要求更新本隐私协议。更新后的协议会通过 App 或相关发布页面提供。

We may update this Privacy Policy according to feature changes or compliance requirements. The updated policy will be provided through the app or related release pages.

## 11. 联系我们 / Contact Us

如果你对本隐私协议或数据处理方式有任何问题，请联系：

If you have any questions about this Privacy Policy or data handling, please contact:
